New Mini Pragma electrical enclosure

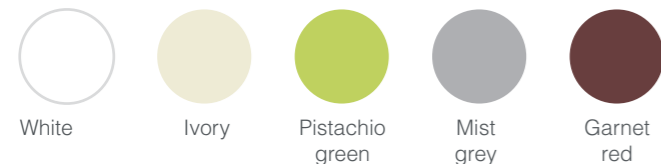

Schneider
Electric

Choose an attractive electrical installation that can be integrated into your interior

Mini Pragma, an electrical enclosure you no longer want to hide...

- Discreetly integrated into its surroundings
- An elegant and innovative design, whose colours and attractive appearance make it highly suitable for a living environment
 - surface-mounted version: white, solid or translucent door
 - flush-mounted version: choice of 5 colours, translucent or white door

Shapes and colours to match the ultra terminal equipment (connectors, switches, etc.).

Mini Pragma, an electrical enclosure with enhanced features for your comfort

Your enclosure is always fitted with a completely flat, **noiseless door** with a clip-on closing system. It can open wide, to allow **easy access** to the protective and control devices, if required.

Your enclosure can be fitted with an attractively designed matching **keylock**; this prevents children or non-qualified people from accessing the switchgear and avoids any risk of direct contact with live parts.

Your enclosure can be fitted with a marker light.

Your enclosure can be fitted with a marker light; in the event of a general power supply failure, the enclosure **remains illuminated** for 15 minutes and can therefore easily be accessed to be restored to normal operation. This lighting is powered by a supercapacitor, which is continuously recharged and needs no battery or accumulator.

Schneider Electric's new Mini Pragma electrical enclosure

Flush-mounted version

1 to 3 rows

4 to 18 modules per row

5 colours with translucent door - tinted or white

Surface-mounted version

1 to 3 rows

4 to 18 modules per row

1 colour with translucent door - tinted or white

Electrical solutions for the home environment, a complete Schneider Electric product range

- Electrical distribution enclosure (flush mounted or surface mounted).
- Protection and control switchgear.
- Switches, connectors, pushbuttons.

Guaranteed safety: conformance with national and international standards

Safe to use:

- protection against electrocution and fire due to short-circuits, overloads or defective devices;
- lightning protection;
- lighting circuit control;
- isolation.

Professional finish, neat attractive design

The material used for the Mini Pragma electrical enclosure and its original packaging contribute to environmental protection

- The back of the flush-mounted enclosure is made of recycled polystyrene.
- The packaging film is made of compostable material in accordance with EU13432. This bioplastic has a low environmental impact. It is manufactured from renewable resources obtained from agricultural sources and it reduces gas emissions and energy consumption. It is biodegradable and compostable.

The sustainable development approach, at the heart of Schneider Electric's strategy and culture

We aim to find the means:

- in the North, to market products and solutions that will help us to waste less energy and to produce and consume energy in accordance with the best practices of environmental preservation;
- in the South, to be a player in providing access to energy for 1.6 billion people who, at present, have no access to pure recycled water, electricity and long-term economic development.
